Snow and Ice Symposium

September 12, 2006

9 a.m. to 4 p.m.

at Landscape Ontario

7856 Fifth Line South, Milton

Get Ready for Winter

The latest in equipment, technology, and smart contracts

Plus on-site equipment show

Snow and Ice Symposium Agenda (9 a.m to 4 p.m.)

Be Prepared for Winter

A full day devoted to the most current operations and management information. A small equipment show and lunch are included.

Snow and Ice Management

Dale Keep

Ice and Snow Technologies, Inc.
Walla Walla, Washington

Get the benefit of the expert advice that Dale Keep offers at his well known Snow and Ice School. Dale will cover the most effective winter maintenance management tools and strategies, including tips on snow removal for roads and parking lots.

He will also explain the pros and cons of sand, salt and liquids, when and how to use them and what equipment best suits each method. Get updates on salt application rates and methods, pre-wetting salt and the latest on direct liquid application and on-board liquid systems.

No question, Dale Keep definitely knows snow and ice. After 26 years in highway maintenance for the Washington State Department of Transportation, he retired and put his vast knowledge of winter maintenance to work as a consultant for Ice and Snow Technologies. Dale was one of four nationally recognized "Ice Warriors" under a federally funded program. In this role, he advised snow states about winter operations with

assistance in training, planning, equipment and product specifications and purchasing.

GPS Systems

Bob Farrell, Vice President,
Pinpoint GPS Solutions Inc.
Mississauga

A short demonstration on how GPS systems work, and how they can save you money and time through route and staff optimization. GPS systems can also help with billing and provide other analytical business information. Find out more about various reporting functions. There will be time for questions.

Equipment Show

See the latest snow and ice equipment and supplies! The lunch hour will be extended to give everyone time to view what's new.

From the Trenches at the MTO

Heather McClintock
Ontario Ministry of Transportation

The Ministry of Transportation (MTO) is continually working on improvements in snow and ice control and on safe ways to reduce salt usage. The Ministry contracts out its snow and ice control services, but sets the standards used by contractors. Heather will talk about the Ministry's experience with pre-wetted salt and de-icing liquids.

Smart Contracts: Protecting Yourself

Robert Kennaley
McLauchlin and Associates
Toronto

Rob, a lawyer with a contracting background, will talk about negotiating a good contract, the difference between good and poor contracts, properly defining the scope of work, managing the risk of slip and fall, unreasonable hold harmless clauses and contractual obligations (such as promising the impossible), the importance of notice provisions and acknowledgements in contracts, and the use of site maps and changes in work. He will also discuss extreme snowfall clauses.

If you would like to display snow and ice equipment or supplies, please contact Pat Hillmer at pat@landscapeontario.com or 905-875-1805, ext 308.
